C/C++
UNIX/Linux

apply now: www.trgworld.com/trgtech

Work on our SATMAP Product Development initiatives / 3 - 15+ years of relevant experience required / Unix , Telephony (Avaya, Cisco, Nortel, Aspect & Spectrum etc.) or SNMP experience is an advantage but not required / International travel (USA, Europe)

SATMAP: Intelligent call routing technology is the next revolution in routing standards, after skill-based routing. By mapping hundreds of variables and using neural network artificial intelligence, SATMAP dramatically improves customer satisfaction and revenues while optimising costs for businesses interacting with their customers.

Apply now for these and other current vacancies (.Net and SQL Server) at

www.trgworld.com/trgtech

Applicants will be processed on a first-come, first-serve basis.

trg tech: **playing mind games** (of the intelligent kind)
